

Scientific Tests

Ascorbic Acid Test

Without AquaKat crystal structures and typical interference colours are barely visible. In contrast to this, **the informed water by the AquaKat**, generates a point-sharped center, with a radial blasting and a polarisation cross. The crystal-typical interference colours indicate an ideally interconnected crystal structure.

Water sample with AquaKat

Lime Crystallisation Test

In the samples **without AquaKat** areas with coagulated (large, connected) shapes and with individual crystals were found, no useful hardness stabilisation took place. Crystal-typical colour effects were not detected. In the samples of water that was treated **with the AquaKat** hardly any coagulated crystal shapes formed. Instead there are small, round, isolated individual crystals, which indicate good hardness stabilisation.

Scientific Conclusion

"Based on the test results we can confirm that the AquaKat has a vitalising effect on the structure and crystallisation behaviour of the substances (minerals) dissolved in the water."

Spring water structures are formed!

Dr. Elmar Langenscheidt,
Mönchengladbach,
Germany

AQUAKAT®

Satisfied Users

Hardness Stabilisation And Lime Homogenisation

A: Heating element before the start of the test, after being in use for 12 months: the limescale was rock-hard.

B: The heating element was descaled with acid before testing commenced.

C: After a three-month run of the system with the AquaKat, limescale has become noticeable again.

D: These limescale deposits were, however, totally soft and could easily be removed with a jet of water.

Sludge Problem In Heating System Eliminated

By fitting the AquaKat on the flow pipe, directly after the boiler system and additionally on the hot water pipe after the water heater, the serious sludge problem could be eliminated.

AQUAKAT®

Holistic Water Vitalisation

Spring water quality from your tap, suitable for home, agriculture and industry.

- Easily fitted
- Maintenance-free
- Works without chemicals
- No running costs
- Many satisfied users

See for yourself!

AQUAKAT[®]

What Is Water?

Water is an irreplaceable natural resource and the well of all life on Earth.

Water Stores Information

Imprinted energy oscillations contain information. Accordingly, pollutant oscillations in the water also contain information. Water is not just clean because the stipulated limits for harmful substances are being met. It can store and also emit ethereal information. Therefore it is not sufficient to just physically clean the water of pollutants, but equally important to treat the ethereal information of pollutants using amendatory frequencies.

Water Is Life! Drink Plenty Of Good Water!

The human body consists of 75% water, two thirds of the surface of the Earth are covered in water. Every day we need to take in at least 2.5 litres of water, because it performs vital functions in our bodies.

The AquaKat[®]

is a physical water vitalisation device which works as a type of signal emitter (catalyst).

How the AquaKat[®] works

The AquaKat passes the frequency patterns that it has been charged with onto the water. This brings the passing water into resonance and changes its molecular behaviour in such a way that its properties resemble those of spring water.

Very Easy Installation

The AquaKat can be fitted to all materials, also directly in the kitchen, bathroom and onto the washing machine. The smaller devices are an ideal travel companion in hotels or caravans.

5 years warranty on processing & material.

Spring water quality directly from your tap! Enriches the lives of humans and animals.

The Solution For Your Water

- Water vitalisation
- Hardness stabilisation and lime homogenisation
- Breakdown of existing limescale deposits
- No rust or red discolouration

AQUAKAT[®]

The right size for every purpose!

AquaKat-S

- Directly on the tap
- For camping and travel
- Vitalisation of reverse osmosis or filter water

AquaKat-M

- Hot and cold water pipes
- Solar heating systems
- Underfloor heating

AquaKat-L

- House and home
- Agriculture
- Industry

For your well-being and health!
