

# AQUAKAT®

*Tap water turns into  
spring water*

AquaKat® is a Swiss-made device which through **resonance** brings new life to tap water and which functions without filter, without electricity and without maintenance for more than 15 years.

**Naturally revitalises and restructures water**

Protects household and industrial appliances.  
Significantly reduces lime scale and rust  
Makes your hair healthy and radiant  
Improves the taste of your cooked food  
Improves the health of your animals

Healthy and revitalized water like spring water for everyday use results in better health and natural softness for your skin, your hair and your laundry. Household appliances using this restructured water remain in a perfect condition for much longer.

**The technology:  
Molecular resonance**

Aquakat functions as a catalyst by emitting signals which, through resonance, restores the natural molecular structure of water. This results in detachment of lime, increased absorption capacity, a virtual absence of rust and a better taste.

**AQUAKAT®**  
**penergetic**  
 the natural biotechnology

**Ecological and sustainable**

Aquakat does not generate any magnetic or electromagnetic field. The device does not come into contact with water and does not requires any maintenance.

**An ultra-simple installation**

Aquakat can very easily be fitted on all types of pipes, directly on the faucets in the kitchen and bathroom or even at the back of the washing machine.

- 5 years guarantee;
- Available in different volumes depending on needs;
- Works on both hot and cold water;
- Lifespan of device > 15 years;
- You do not touch existing piping;
- Cost less than 3 euros per month for a family of 4;
- Significant savings on chemical products, cleaning products, scouring and repairs

**Already very successful in Switzerland**

**Simple installation  
No maintenance**

**For use  
in households  
In agriculture  
In industry**
