Penergetic G (Slurry)

Make your liquid manure liquid, odourless, crust free and 50% richer in releasable nitrogen

Photo Tocrop: Luxembourg, June 2018

Photo Tocrop: Luxembourg, December 2018

- ▶ Develops the releasable nitrogen rate by about 50%
- ▶ Reduces the need for fertilizer chemicals for your crops
- ▶ Reduces the cost of production
- ▶ Slurry easier to spread
- ▶ No residue, no pollution
- ▶ Deeper root tissue of crops
- ▶ Plants more resistant to drought

- ▶ No bacteria used
- ▶ Removes odour
- ▶ Removes floating layers
- ▶ Stimulates soil biological activity and disease resistance
- ▶ Low-cost product
